

## **Transcript: Why I Chose a Career in Massage Therapy**

I just had this clarity one day I'm gonna go to massage school.

I came to this magical place after meeting a student who was at a festival giving out massages and I was really interested.

I'm actually from Gainesville you know so I mean I've always driven by this place even as a kid the hands you names and the hands are the big thing as a kid I was like oh!!! And when I came I fell in love with it it was just instant this first day that I came it was like yes I want to come here.

So for me massage therapy is just another way to connect with a human being in a way that contributes to a sense of unconditional love in a safe space.

The teachers here have so much passion and it's such a stress-free environment that you are able to obtain the information that they are trying to convey to you.

You can have therapeutic relationships or you know touch relationships that genuinely promote a sense of better well-being and overall healing, maybe even something transformational!.
